

Testing Package arcs.sty

John Gresham Ranger College

February 24, 2011

Instructions to set up the arcs.sty package found at TUG in a SWP document.

1. Create a folder named "arcs" (no quotes) under the LaTeX folder. Here's mine:

```
\swp55\TCITeX\TeX\LaTeX\arcs
```

2. Download arcs.sty from TUG and save it in the arcs folder.

3. Preview or Preview PDF this file. It already has the command

```
usepackage{arcs}
```

Now let's try the arc command. Consider the \overarc{ABC} \overarc{ABC} on a circle. Now we will illustrate the \underarc{AB} command \underarc{AB} on a circle.
